1. What is a restaurant Bluetooth USB receipt printer?

It is a thermal printing machine used to print restaurant bills, customer receipts, and order details through supported Bluetooth or USB connections.

2. Can this printer connect to a mobile phone?

Yes, if the printer supports your phone's operating system and the required Bluetooth printing application.

3. Does this printer require ink?

No. Direct thermal printing technology uses heat-sensitive thermal paper instead of traditional ink cartridges.

4. Where can this printer be used?

It can be used in restaurants, hotels, cafes, bakeries, supermarkets, food courts, and retail shops.

5. Can it be connected to a computer?

Yes, through USB, provided the printer driver and operating system are compatible.
