1. What is a token printer?

A token printer is a printing device used to generate numbered or customized tokens for managing customer queues and service counters.

2. Where can I use a token printer?

It can be used in hospitals, clinics, restaurants, hotels, supermarkets, banks and customer service centres.

3. Does a thermal token printer require ink?

No. Direct thermal printing uses heat-sensitive paper and does not require traditional ink cartridges.

4. What are the benefits of a token printing machine?

It helps reduce manual work, organize customer queues, improve counter efficiency and provide printed tokens.

5. Is the EROMART Token Printer suitable for commercial use?

Yes. It is designed for token and receipt printing requirements in various commercial environments.
